

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

Research Firm/Institution:

1988 Payne, T.M. and R.A. Thomas
Prehistoric Site 18FR592 - Phase II Archeological Investigations for Maryland Route 77 over
Double Pipe Creek, Carroll and Frederick Counties, Maryland.
Submitted to the Maryland Department of Transportation

Library ID No: 00005375 Catalog/Shelving ID: CR 10

MAAR Associates Inc.
P.O. Box 676, 9 Liberty Plaza
Newark, Delaware 19715

Sites examined:

18FR592

Project Details:

Phase I	<div>Project Justification:</div>	<div>Project Objectives:</div>
Phase II <input checked="" type="checkbox"/>	Phase II Testing was conducted as part of the MDOT planning activities for a bridge replacement and associated road realignment of Route 77 over Double Pipe Creek.	-Determine the site history, boundaries, purpose, integrity, significance, and the potential impact to the site due to the road realignment.
Phase III		

MAC Accession: 1987.017

Research Potential:

Little can be said regarding the nature of 18FR592, but it seems to have served as a short-term camp during Late Archaic times. Odds are that the site is heavily disturbed based on the observed distribution of artifact concentrations. However, testing within the defined site boundaries was limited to a single, peripheral 2 X 2 unit. Thus, its integrity (and ability to address significant research questions) is still in question.
